

EDITAL

Tendo apreciado as candidaturas ao Mestrado em Economia (3ª fase), de acordo com os critérios previamente estabelecidos, a equipa coordenadora do Mestrado vem publicar a lista seriada das candidaturas aceites e das candidaturas recusadas.

Tendo sido considerados um a um todos os candidatos, as notas de candidatura atribuídas aos candidatos admitidos, bem como a decisões de recusa, resultaram da votação dos membros da comissão coordenadora, constituída em júri.

A seriação foi feita com base na nota de candidatura que foi calculada pelo processo que se descreve no anexo “Ranking and Selection Criteria for Candidates to the M.Sc. in Economics at ISEG-ULisboa”. Apenas se aplica aos alunos que cumpram os pré-requisitos, que constituem condição necessária, mas não suficiente para a obtenção de uma nota de candidatura positiva.

Candidaturas aceites

NOME	NOTA
ÁNGEL MUÑIZ MEJUTO	12,33
SHIQING SONG	12,01
JOÃO CARLOS BATISTA VAZ FERREIRA DA GRAÇA	10,9
JOHANNA VALENA WERNER	10,9
MARIA CALBO CRUZ AUÑON	10,89
THALLES RODRIGUES DE SIQUEIRA	10,52
ALZBETA DOBESOVA	10,51
ZINA SKORNOVA	10,5
CAROLINE FRAGOSO DOMINGUES DOS SANTOS	10,5
MAURÍCIO CALDEIRA E CONCEIÇÃO	10,48
CATARINA RAQUEL DE CASTRO BARBOSA	10,47
JARBAS DELLAZERI PIXIOLINI	10,47
SUSANA FILIPA CARDOSO DIAS	10,23
ANDREA GALLINA	9,97

ANEXO

RANKING AND SELECTION CRITERIA FOR CANDIDATES TO THE M.SC. IN ECONOMICS AT ISEG-ULISBOA

By Luís F. Costa

1. THE FINAL APPLICATION MARK

The final application mark (f) is obtained as follows:

$$f = \begin{cases} 0.9t + 0.1c & \Leftarrow t \geq 9.5 \\ t & \Leftarrow t < 9.5 \end{cases},$$

where t is the transformed final average mark (GPA) in the undergraduate course and $c \in [0, 20]$ is the qualitative mark for the candidate's CV.

Minimum absolute merit requires that $f \geq 9.5$. However, the course coordination may impose that only candidates with $f \geq \bar{f} > 9.5$ are eligible for the M.Sc. in Economics (MEc).

2. THE TRANSFORMED FINAL AVERAGE MARK

The qualitative mark t is the one considered equivalent to a final average mark m in the undergraduate Economics course at ISEG. The transformation is a linear function for different course-school-GPA groups and it is given by

$$t = a_i + b_i m,$$

where $m \in \{0, 1, \dots, 10, 11, \dots, 20\}$ is the Portuguese-equivalent GPA and parameters a and b are given by the following table:

Group i	a_i	b_i
A	0	1
B	227/30	19/60
C	217/30	7/30
D	39/5	1/5
E	7/2	1/2
F	19/5	2/5
G	3	2/5
H	3	2/5
I	11/5	2/5

For marks obtained in Portugal, m (always an integer) is just the GPA. For marks obtained in other countries, we use <https://www.foreigncredits.com/resources/grade-conversion/> to convert it to the Portuguese system.

The course-school-GPA groups are obtained as follows:

- Group A – $m \geq 14$ in undergraduate degrees in Economics, Finance, and Applied Mathematics to Economics and Management in international-level schools.
- Group B – $m \geq 14$ in undergraduate degrees in Economics, Finance, and Applied Mathematics to Economics and Management in national-level schools. Business and Management courses obtained in international-level schools. Other degrees, except Management, Arts, Social Sciences (except Psychology), and Humanities obtained in international- or national-level schools.
- Group C – $m \geq 14$ in undergraduate in Economics, Finance, and Applied Mathematics to Economics and Management in regional-level schools. All the other degrees not included in A and B.
- Group D – the same as group A, but with $m \in \{12, 13\}$.
- Group E – the same as group B, but with $m \in \{12, 13\}$.
- Group F – the same as group C, but with $m \in \{12, 13\}$.
- Group G – the same as groups A and D, but with $m \in \{10, 11\}$.
- Group H – the same as groups B and E, but with $m \in \{10, 11\}$.
- Group I – the same as groups C and F, but with $m \in \{10, 11\}$.

Therefore, this means that candidates from groups F, G, H, and I are not eligible for the MEc, in general.

Three exceptions:

- i. When the candidate has already passed a significant number of credits in detached MEc courses. E.g. an ISEG student in Economics with $m = 13$ (group D), but that did not finished his/her undergraduate degree; if he/she passes the above-mentioned detached MEc courses, then can be classified as C by the selection panel.
- ii. A student from group F that has completed a significant part of another M.Sc. course at ISEG can be classified in group E by the selection panel.
- iii. Students that obtained his/her (last relevant) undergraduate degree 10 or more than years ago, can be classified in the group below.

3. THE QUALITATIVE MARK FOR THE CANDIDATE'S CV

We take into account the following items:

- a) The preference for the course.
- b) Motivation and reference letters.

LISBON
SCHOOL OF
ECONOMICS &
MANAGEMENT
UNIVERSIDADE DE LISBOA

- c) Average marks obtained in compulsory undergraduate courses in Mathematics, Economic Theory (Macro and Micro), Statistics, and Econometrics.
- d) Professional and personal experience, including its relevance for the MEc.

4. SCHOOL LEVELS

The selection panel defines of what are international, national, or regional level schools based upon:

- i) Past statistical performance of students from the same degree-school in the MEc first-semester compulsory courses in their entry year.
- ii) When no past information is available, relevant international rankings may be used to classify schools, e.g. Kalatzidakis, P, Mamuneas, T, and Stengos, T (2003) Rankings of Academic Journals and Institutions in Economics. *Journal of the European Economic Association* 1, 1346–66.
