

NOTICE

Having assessed the applications of the candidates for the Masters in Data Analytics for Business (2nd phase), according to the previously established criteria, the coordinating team of the Masters hereby publishes the ranked list of the names of the admitted candidates, the rejected candidates, and also of those whose assessment has been deferred until the 3rd phase, in compliance with the provisions of number 6) of Order No. 65N/P/2014 of the Dean of ISEG, of the 18th of December.

Having assessed all the candidates one-by-one, the attribution of the grades of the admitted candidates, as well as the decisions to reject or defer until the 3rd stage was the result of a panel vote by the members of the Masters Coordinating Committee.

Accepted applicants

APPENDIX

Admission and Ranking of the Student Applicants for the Masters in Data Analytics for Business

Calculation for the Grading of the Candidates

1. The ranking is based on the grade which is awarded to each candidate. This grade is calculated according to the process described below.
2. The application grade is based on the average final grade of the 1st cycle. This average is converted to the 0-20 scale and can be multiplied by a coefficient ranging between 0.8 and 1.2, depending on the committee's assessment of the University conferring the degree and of the degree itself. Bonus points or penalties can be added depending on the classifications obtained by the students in specific curricular units, specifically those related to Probability and Statistics, and to Programming and Information Systems Management. This score ranges between -2 and 2. The candidate's professional experience in areas related to the subject matter of the Masters can be taken into account by means of a score ranging between 0 and 1 point.
