

The Masters in Economics is intended to complement and build on a Bachelors degree in Economics. The main objectives are to provide students advanced knowledge in economic theory and in the methods and empirical techniques which are useful to analyse economic reality.

Presentation:

This Masters prepares students to pursue careers as economists, researchers, lecturers and senior managers in firms, banks, international organisations and public institutions.

It aims to provide the following:

- > advanced knowledge in the field of economic theory;
- > methodologies and techniques needed for analysis and research in the fields of theoretical and applied economics;
- > adequate background for going on to study Economics at Doctorate level (as it guarantees direct access to the Economics Doctorate at ISEG).

Start Date:
September

Duration:
2 years

Schedule:
Evening Classes

Total Fee
Students from UE: €5750
Students outside UE: €7000
