health system, our lifestyle, the economy, and public

finances. It is also a threat to teaching and research and

the creation and sharing of knowledge in the pre-pandemic

format. However, universities have demonstrated that they

are capable of innovating and of changing, in order to adapt to these extreme new circumstances. ISEG was no

"Teaching is facing a threat, especially university teaching. The pandemic is a threat to human life, the

plural thinking, from Economics through to Management, based on informed debate and a profound and genuine concern about the social contextualisation of major individual, business, and political decisions. Since 1911 we have been crafting opinion leaders who influence both the country and the whole world. Here

exception, and it too adapted with dedication, effort, creativity and perseverance. The transition from a 100% face-to-face education system to a 100% remote learning system was made in a few days, with lectures being taught online through virtual sessions virtual, with work being prepared and discussed online, with much support being provided by email. In general, there is a feeling of accomplishment and of the fulfilment of the objectives of a semester which at first seemed lost. All the university actors deserve to be mentioned, without exception – leaders, faculty, students, and the support services. All have shown that universities, and in particular ISEG, are prepared to reinvent themselves in the face of threats and become stronger in adversity. However, the future is unknown and it is necessary to maintain this process of adaptation and be prepared for all scenarios.

The teaching and research model for the next Academic Year must be based on a response based on flexibility and the ability to adapt. We must all be prepared to act in response to different scenarios and to be prepared for a variable context during the next Academic Year. The demands will be many and the response need to be planned in advance. However, the recent past has enabled us to be optimistic. For the results achieved during the second semester of this Academic Year are a foretaste of the collective capacity of being capable to respond successfully to overcome the challenges ahead."
