Moody's Analytics ESG Score Predictor Workshop

Training	Moody's Analytics ESG Score Predictor Workshop
Location	Via zoom meeting
Date	15-05-2023
Time	11:00 – 12:00 am (Lisbon)
Duration	1h00m
Language	English
Audience	Master's students, PhD students, professors and researchers from ISEG.
Course Outline	Assessing environmental, social, governance (ESG), and climate risks is generally subject to data constraints, including limited company coverage. Moody's ESG Score Predictor is a series of models designed to provide over 50 comparable and standardised metrics, including: • Granular ESG scores • An energy transition score • Physical risk management scores and carbon emissions footprints As long as data exists regarding a company's size, location, and sector, we can use these three factors as data entry points to generate predicted metrics using the core ESG Score Predictor models, which thus means that our coverage is virtually infinite.
Pre-requisites	Access to a computer/mobile/tablet with an internet connection
Notes	**Register here!**
