lecture on 'Waste is a design flaw: how circular economy can be a gamechanger for Industries',

delivered by Marta Brazão, from Circular Economy Portugal. The event was a success and shared valuable insights into the importance of the circular economy in industry and everyday life. The Second Hand Clothes Market, organised by AEISEG, took place at Kasino on the 9th April. This

event not only promoted conscious consumption, but also offered an alternative to fast fashion, actively

contributing to the SDG12. In addition, throughout the month we are holding various initiatives with the objective to improve ISEG's

waste management. These actions include weighing waste, specific training for our cleaning team, and awareness-raising campaigns for our community, reinforcing the importance of everyone's participation in

sustainable waste management.

ISEF's SDG Project Officer

Gabriel Londe Medeiros

Another event will be held on the 16th April, in conjunction with the MAIS - More Awareness in Society, which is dedicated to raising awareness of climate change. This promises to be a relaxed and educational moment, which will take place in Room 107 - F1.

The high point of our celebration will take place on the 22nd April, when we will be organising a special activity in ISEG's urban mini-forest. Scheduled for 14.00, we will be watering, weeding, and applying organic matter to the soil, followed by a picnic, which will provide a direct and enriching contact with nature, coordinated by Oriana Bras, a researcher at SOCIUS, and António Alexandre from FCUL. On the 29th and 30th April, Carbon Literacy training

will take place at ISEG, a UK-led initiative that raises awareness and educates about the importance of reducing carbon emissions and the **impact of climate change**. This training will take place

over two days, from 16.00 to 19.30 in Boom 002. Francesinhas 1, and includes the award of a certificate of completion. Prior online registration on this link is obligatory. These initiatives reflect ISEG's commitment education for sustainability and environmental action, extending an invitation to the community as a whole to actively participate in preserving our planet.

Inês Sofia, a student of Applied Mathematics for Economics and Management (MAEG), launched her book entitled 'O segundo lado da perfeição' (The other side of perfection) on the 7th April at the Fernão do Pó Primary and Secondary School in Bombarral. The book explores the subject of abusive relationships. During the presentation, she explained that her writing process began at a very young age: "In the 4th Grade I was already writing poems and plays. I even convinced all my classmates to act in one of these plays. I was always the different girl, that's where it all started," the young writer revealed.

This is her second book. She wrote her first book entitled 'Emoções à Flor da Pele' when
